Aggressive Blend, Solid 4' Big Rolls

Green Valley Turf Co. understands the demanding conditions put on professional sports fields, schools and park & recreation districts. For the sports industry, we offer our GVT Sports Blend Kentucky bluegrass. These proven aggressive varieties stand up to high use and recover quickly. This blend, maintained at 1 1/4", has large tough rhizomes and is very dense. The sandy soil we grow this blend in allows this sod to percolate water efficiently and is compatible with sand based systems.

Green Valley Turf Co. is one of the few farms capable of harvesting 4' wide solid cut big rolls. Our big rolls are cut 3/4" thick and on request, up to 2". GVT developed big roll installation machines that do not rut properly prepared soil and excel on sand based systems. During installation we grade, patch and clean as we go allowing water to be quickly applied to avoid stress. Our large crews are capable of professionally installing a full size football or baseball field in one day. We have over 42 years of sod experience and have installed hundreds of sports fields. Call the Big Roll Experts for your next field.

Products, Services

- 100% Kentucky Bluegrass, GVT Sports Blend (P-105, SR 2100, Award, Limousine)
- 1 1/4" height of cut, 80% Native Sandy Soil
