

TAHOMA 31[®]

BERMUDAGRASS

Save Water, New for 2022!

Tahoma 31™ is a new cold-tolerant bermudagrass that uses 50% to 75% less water compared to cool-season grasses. We have tested this grass for four years and love it due to its wear tolerance, thick density, and low water use. Tahoma 31™ rated #1 in high traffic areas and thrives in the heat of the summer. This new grass requires less mowing and excels at various mowing heights. Tahoma 31™ can handle partial shade, resists dog urine, and fills in bare spots quickly. Enjoy a beautiful, lush, low maintenance lawn and help save water. Green April to October.

Up to 75% Water Savings,
Thrives in the Heat

Save Water One Lawn At a Time!

The new standard for Colorado drought tolerant lawns. Reduce outdoor watering up to 75%.

Less Mowing, Dense Fine Textured

With a low vertical growth, Tahoma 31 requires less mowing and less clipping. Leaf blades have a dark green color, fine texture, and this grass is very high density.

Crushes the Cold

Tahoma 31[®] is among the most winter-hardy of the improved hybrid bermudagrasses on the market today! Tahoma 31™ tested #1 in cold tolerance winter survivability.

Salt Tolerant and Shade

Tahoma 31™ ranked #1 when tested for salt tolerance and #1 in shade tolerance compared to other hybrid bermudagrass.

Uses

Home lawns, pets & kids, streetscapes, parks, commercial properties, high summer use areas

Sod Blend

100% Tahoma 31

Texture

Fine leaf blade, dark green color

Mowing Height

1/2" to 4"
