

Our Drought Tolerant Sod

Since 1962

Tahoma 31™ Bermudagrass

Tahoma 31™ is a new cold-tolerant bermudagrass that uses 50% to 75% less water compared to cool-season grasses. We have tested this low-growing grass for four years and love it due to its soft, dense surface, wear tolerance, and color. This new grass loves traffic, requires a lot less mowing, and can handle open shade. Tahoma 31™ thrives in the heat of the summer, resists dog urine, and fills in bare spots quickly. Enjoy a beautiful lush low maintenance lawn and help save water. Green April to October.

Full Sun to Light Shade | 50% to 75% Less Water | Less Mowing | Special Order, May to August

Save Water One Lawn at a Time

TAHOMA 31
BERMUDAGRASS

RTF® Water Saver

RTF® Water Saver sod is a self-repairing Tall Fescue that develops a deep root system that can go longer between watering. A New Mexico State University trial proved RTF® maintained high turf quality with 30% less water. RTF® is our most adaptable blend that excels in full sun and shade. RTF® can be mowed at various heights. If left un-mowed, RTF® only grows to 12" in height and provides a beautiful naturalized look. This grass has increased tolerance to dog urine due to its tough leaf blade. Be sure to get the real RTF® - We are the only licensed grower in the Denver metro area!

Full Sun to Shade | Increased Water Savings | Strong Deep Root System | Special Order

Colorado Blue™

Colorado Blue™ is a drought-tolerant blend of elite Kentucky bluegrasses blended for our dry climate. This blend is dense fine textured dark green grass that is extremely wear tolerant. Great for kids and pets! Colorado Blue™ is loaded with rhizomes that actively grow horizontally and fill in weak areas. This blend can withstand wear and recover quickly. Ideal for backyard play, high traffic areas, and sports fields.
