

New for 2026

REGENERATE

Water Wise

Regenerate Water Wise is a new, better tall fescue blend with high drought tolerance and fast recovery from wear. This Water Wise tall fescue blend uses 15-30% less water than bluegrass. Due to Inherent Rapid Tiller-ing (IRT™), Regenerate forms a smooth, dense lawn and does not clump like older tall fescues. It performs remarkably well in diverse environments and under challenging conditions that demand resilient turf. Regenerate water-wise excels in hot, sunny areas and is our most shade-tolerant grass. Regenerate Water Wise is a better tall fescue.

Up to 30% Water Savings
Sun & Shade

Heat & Drought Tolerance

The varieties in this blend are selected for our dry climate and are very heat and drought tolerant.

Strong, deep root zone

Extensive root system draws moisture from a deeper soil profile.

Produces a thick even lawn

Regenerate forms a smooth, dense lawn with fine blades that look like bluegrass.

Performance

It performs remarkably well in diverse environments and under challenging conditions that demand resilient turf.

Uses

Home lawns, pets & kids, streetscapes, parks, commercial properties, golf bunkers, rough, naturalized no mow areas

Sod Blend

Regenerate, Rover, South Side, SPF 30

Texture

Fine leaf blade, dark green color

Mowing Height

1/2" to 4" or no mow 12"
