

RTF® Water Saver Sod is a patented self-repairing rhizomatous tall fescue that grows a deep root system for increased water savings. Unlike traditional tall fescues that become patchy, RTF® creates a dense, uniform turf. Excellent heat and drought tolerance with less irrigation, RTF® can go longer between watering. This hardy medium texture blend is resistant to dog urine and fills in bare spots.

Up to 30% Water Savings Shade to Full Sun

Increased Water Savings

A New Mexico State University trial showed RTF® maintained high turf quality with 30% less water. Go longer between waterings.

Strong, Deep Root System

Excellent heat and drought tolerance with less irrigation. Extensive root system draws moisture from deeper in the soil profile.

Produces a Thick Even Lawn

RTF® stays thick and does not form clumps like most tall fescues. A dark green medium textured grass.

A Better Tall Fescue

RTF® is a self-repairing turf that fills in damaged areas. This low thatch producing grass is resistant to Necrotic Ring Spot and excels in the shade.

Uses

Home lawns, pets & kids, streetscapes, parks, commercial properties, golf bunkers, rough, naturalized no mow areas

Sod Blend

90% Rhizomatous Tall Fescue, 10% KBG

Texture

Medium leaf blade, deep green color

Mowing Height

2" to 5", or No Mow RTF® will only grow to 12" in height
