Covers 5000 SQ. FT. NET 25 LBS (11.3 Kg)

# **The Secret Behind Greener Lawns**

# Organic-Based Water **Saving Soil Treatment With Supplemental Nutrition**

## **What Revive Does**

- Conserves water during times of drought, severe heat and watering restrictions by wetting the soil deeper allowing your lawn to store more water between irrigations.
- Makes better use of water as it penetrates deeper into the soil, runs off less on slopes, and reduces evaporation.
- Moves fertilizer deeper into the roots, while providing supplemental iron.
- · Assists in breaking up and loosening compacted soil *by promoting root activity.*
- Helps eliminate dry brown spots and turn lawns green.

Revive improves water penetration into soil making more water available to plant roots even in times of restricted water use and drought so you can go longer between waterings, enhance your lawn's appearance and reduce total water consumption.

Developed with natural, organic-based products.

The ingredients of Revive's fertilizer are fortified with iron

Turn lawns dark green and help maintain thickness. Stop the

# The Revive Secret

Revive is an organic-based soil treatment made from a combination of soil wetting agents, natural organic lignosulfonates and iron. Revive allows water to penetrate deeper into hard-to-wet soils, even through thatch and mat. Revive helps save water and solves problems associated with hard, dry, compact soils and the additional iron helps thicken and turn your lawn dark green.

Granular Revive is made with DPW (Dehydrated Poultry Waste) containing primary plant foods that have a low burn potential. The result is a slow-release, non-burning organic-based fertilizer that saves water.

## **Directions For Use**

Lawn and Turf Areas: Apply Revive any time during the growing season. Revive is especially beneficial if applied before, during or after applying fertilizer. Treat brown areas, where puddles form, slopes where run-off occurs, and around landscape plants. Cover entire lawn area. For best results, thoroughly water after application. You can apply Revive after sodding or seeding.

ecommended Re-application Frequency:	Spring	Summer	Fall
eatment - problem areas only:	6 wks	4 wks	6 wks
oadcast - cover entire lawn:	6-8 wks	4-6 wks	6-8 wks

For lawns grown on heavy clay, caliche, or alkaline soil or lawns that are heavily thatched and matted, 2-3 applications are recommended at 10-day intervals when beginning treatment.

**Landscape & Flower Beds:** Treat entire area(s) before planting or before plants flower. For best results, water thoroughly after application. Re-apply as needed. Revive can be easily applied with a drop or broadcast

NOT FOR USE IN ORGANIC CROP AND FOOD PRODUCTION IN ALL STATES, INCLUDING CALIFORNIA

CAUTION

KEEP OUT OF THE REACH OF CHILDREN. MAY STAIN WOOD AND CONCRETE.
