

HD Sports 2.0 is the new standard in high density performance sports turf. Extremely wear and traffic tolerant, HD Sports recovers rapidly from hard play. This expertly blended turf includes the variety Hampton , or “The Root Monster”, which gives it an extremely fibrous root system for heavy duty strength. This blend has superior genetics, giving it a remarkable advantage over turf diseases like summer patch. HD Sports 2.0 holds its dark color all year long with early spring green up and extended fall color, excelling in both sun and shade. HD Sports blend uses superior varieties of heavy duty Kentucky bluegrass, creating a synergy that out performs other blends on cleated sports fields.

High Density Bluegrass Sports Sod Grown On Plastic, 100% Sand

Strength

Deep and fibrous root system is the HD advantage for rapid repair and fast turf recovery.

Wear

HD Sports 2.0 sod has superior wear and traffic tolerance due to high density turf that withstands the abuse of cleated traffic.

Color

Elite varieties selected for uniform dark green genetic color with early spring green up and season long performance well into the fall.

Performance

All varieties place in the top 25% of the NTEP's and are superior performers. Varieties selected for performance and individual strengths.
