RPR™

Regenerating Perennial Ryegrass

Barenbrug's innovative regenerating perennial ryegrass (RPR™) has tremendous wear tolerance, a hands-down favorite over any other regular perennial ryegrass variety. RPR™ is not as aggressive as bluegrass, but its creeping growth habit makes the turf absolutely wear like iron! RPR™ was bred in a harsh climate and withstands severe drought very well.

- Best wear tolerance available among all perennial ryegrass varieties
- Regenerating ability keeps your sports field lush and healthy
- Dark colored
- High turf quality
- Uses less water
- Save even more water with Yellow Jacket® coating

Product Composition

100% *Regenerating Perennial Ryegrass*

Germination speed	1 2 3 4 5 6 7 8 9 10
Speed of growth	1 2 3 4 5 6 7 8 9 10
Fertilizer requirement	1 2 3 4 5 6 7 8 9 10
Water requirement	1 2 3 4 5 6 7 8 9 10
Cutting height	1/2 – 2"
Sowing rate	6 – 8 lbs / 1,000 sq. ft.
Available bag size	50 lbs

1 = low or slow, 10 = high or fast

Turf Saver RTF®

Turf Saver RTF® is the most advanced tall fescue blend on the market. It is a very unique combination of regular, high quality tall fescues and RTF®. RTF®, Rhizomatous Tall Fescue, gives Turf Saver® the added value no other tall fescue blends have. RTF has proven at New Mexico State University to be the best drought tolerant cool season grass in their 3 year study for drought tolerance. Both under 15% and 30% less water, RTF was the best performer.

Turf Saver RTF® is very useful for sports fields. It has been used a lot of sports fields and performs very well. .

- Fill your bare spots automatically
- Reduces clumps in thinning turf
- Great turf quality
- Better disease resistance because of endophytes

- Best drought tolerant cool season grass
- Tolerates low mowing
- Very deep root system utilizes water more efficiently

Product Composition

40% *Rhizomatous Tall Fescue*
60% *Elite Tall fescue*

Germination speed	1 2 3 4 5 6 7 8 9 10
Speed of growth	1 2 3 4 5 6 7 8 9 10

Cutting height	1 – 2"
Sowing rate	6 – 8 lbs / 1,000 sq. ft.
Available bag size	5, 10, 25, 50 lbs

1 = low or slow, 10 = high or fast

Water Saver® Pro

This high quality tall fescue blend performs very well in low-maintenance (semi) rough areas. Water Saver® Pro contains varieties with fine leaves and excellent disease resistance. It has very high drought tolerance, so you can conserve water and still maintain quality turf. This blend will exhibit great performance, especially in areas of the US transition zone and north.

Water Saver® Pro is available with Yellow Jacket® coating, which holds water around the seed during germination and establishment. A key component of Yellow Jacket® is Zeba®, a corn starch derivative that can hold up to 600 times its own weight in water. This gives the seed an advantage because it requires less water than uncoated seed.

- Save valuable water with the deep root system
- Excellent in sun and shade
- Tolerates low mowing
- High traffic tolerance
- Save more water with unique Yellow Jacket® coating
- Beautiful dark green turf
